

# CAPABILITIES — AMAZON WEB SERVICES

## Seamless Transition to the Cloud

Our AWS Migrations harness Migration Hub, ensuring a smooth transition that powers business continuity. We facilitate growth by enabling quick, reliable cloud integration, setting the stage for your company's expansion.

## Start Strong with AWS

By utilizing Control Tower and AWS Organizations, we lay the groundwork for innovation. Our services provide a structured, compliant environment, fostering a scalable and efficient cloud ecosystem conducive to business growth.

## Database Migration Made Easy

Our expertise in RDS and DynamoDB positions your data management for a competitive edge. We streamline database migration, allowing you to leverage AWS's powerful database services for reliable performance and accessibility.

## Intelligent Data Pipelines for Insight-Driven Decisions

We craft intelligent data pipelines using Kinesis Firehose and Glue, turning data into a strategic asset. This infrastructure supports growth by enabling you to make insight-driven decisions, leveraging analytics for market responsiveness.

## Future-Ready Cloud Infrastructure

Employing CloudFormation and Terraform, we build a robust infrastructure that supports your business agility. Our approach prioritizes scalable solutions and security, leveraging EC2 and S3 to empower your business to adapt and thrive.

## Our Expertise as Your AWS Partner

- AWS Control Tower & Organizations
- Migration Hub & Direct Connect
- RDS & DynamoDB
- AWS Glue & Kinesis Firehose
- CloudFormation & Terraform
- EC2 & S3
- GuardDuty & Security Hub
- IAM & IAM Identity Center
- CloudTrail & CloudWatch
- CloudFront
